

InterQual® strongly recommends that this list be reviewed and approved at an organizational level before it is instituted. It is imperative to note that InterQual's Guidelines for Surgery and Procedures in the Inpatient Setting is not designed to be all-inclusive and does not necessarily align with CMS guidelines on inpatient settings.

InterQual's *Guidelines for Surgery and Procedures in the Inpatient Setting* was developed to assist clients in determining when a procedure might be appropriate for the inpatient setting. A procedure is designated as inpatient when admission to the hospital is planned prior to the procedure being performed. Patients who experience complications during an outpatient procedure, or immediately postoperatively, may require an inpatient admission. Appropriate criteria for complications of outpatient surgery can be found in the InterQual® Acute Level of Care Criteria.

The decision to admit a patient for a surgical procedure remains the responsibility of the treating provider. Determination of the appropriate setting (inpatient versus outpatient) is a clinical decision best made with consideration of multiple clinical factors including, but not limited to:

- type of procedure planned (e.g., laparoscopic versus open procedure, need for postoperative drains, monitoring, or therapy)
- urgency of the procedure
- patient's hemodynamic stability
- medical stabilization of comorbidities (e.g., cardiac function, diabetes)
- likelihood of complications based on patient's medical history (e.g., bleeding, infection, thrombotic events, fluid or electrolyte imbalance)

The actual setting may differ based upon legislative and geographic variances, including the sophistication level of the facility and their available resources, and might impact organizational policy. Documentation of the patient's clinical condition is essential to ensure the appropriate setting and level of care required.

Procedures and interventions listed in these guidelines are organized alphabetically by surgical specialty (e.g., General Surgery, Orthopedics, Vascular) into two groups. The first group includes procedures and interventions for which InterQual Procedures Criteria are available to support medical necessity and the inpatient setting designation (as indicated by Yes IQ). The second group includes procedures and interventions that are appropriate for the inpatient setting but are not addressed by the InterQual Procedures Criteria (as indicated by No IQ).

Organizations that follow the Center for Medicare and Medicaid Services (CMS) inpatient designations can find a link to the CMS Inpatient Only List (Addendum E) on the InterQual® Resource Center.
Go to Clinical Resources > Knowledge Articles and select Level of Care > CMS/Medicare.

Interpreting the Guidelines

Qualifiers have been added to certain procedures to specify when that procedure is appropriate for the inpatient setting.

Qualifiers	Example
Certain approaches, age restrictions, or conditions make a procedure appropriate for the inpatient setting.	Sinusotomy, Frontal: Open- The inpatient setting is appropriate when a sinusotomy is performed via an open approach, while a sinusotomy via an endoscopic approach can be safely performed in the outpatient setting. Arthroscopy, Surgical, Hip- The inpatient setting is appropriate when arthroscopy is performed for lavage of the joint when the joint aspirate is diagnostic for infection, while arthroscopy for other indications can be safely performed in the outpatient setting.

An asterisk “*” next to a procedure indicates the procedure may be performed in either the inpatient or outpatient setting. InterQual recommends that hospitals consult with the responsible health plan prior to making a formal decision to determine the actual setting. At present, there is insufficient evidence to clearly define procedures marked with a “*” as being inpatient or outpatient due to variations in practice, the physician’s experience, the presence of medical comorbidities, the potential for significant complications, the need for prolonged monitoring, and the actual length of stay.

Meckel’s Diverticulum Excision:

Laparoscopic*

Open

In this example, the open procedure is appropriate for the inpatient setting, but laparoscopic excision may be appropriate for either the inpatient or outpatient setting.

Gastric Stimulation*:

Enterra Therapy System*

Gastric Pacemaker insertion*

In this example, gastric stimulation may be appropriate for either the inpatient or outpatient setting.

When a Procedure includes an approach or condition, the specific approach or condition should be consulted to provide the setting information. In cases when all the listed conditions or approaches can be done in either an inpatient or outpatient setting, the procedure name will also be marked with an asterisk. When all approaches or conditions listed are inpatient or the approaches or conditions settings are mixed, the procedure will be listed without an asterisk.

When a procedure is also known by another name, or if a different procedure will produce the same result, the additional procedure name is italicized and indented beneath the original. For example: “Total Joint Replacement (TJR), Hip” is also known as “*Arthroplasty, Total, Hip*.”

Procedures in the Pediatric category have been specifically reviewed or evaluated for pediatric indications.

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA	
Pediatric	Yes IQ		Recurrent hernia*		
Pediatric	Yes IQ			Laparoscopic Ventral or Incisional or Epigastric Hernia Repair +/- Mesh*	
Pediatric	Yes IQ			Open Ventral or Incisional or Epigastric Hernia Repair +/- Mesh*	
Pediatric	Yes IQ			Ventral or Incisional or Epigastric Hernia Repair +/- Mesh*	
Pediatric	Yes IQ	Hyperbaric Oxygen Therapy*			
Pediatric	Yes IQ	Laparoscopy, Diagnostic (Abdomen) for Abdominal or Pelvic Trauma*			
Pediatric	Yes IQ	Laparotomy or Exploratory Laparotomy:			
Pediatric	Yes IQ		Trauma		
Pediatric	Yes IQ		Drainage of Intra-abdominal Fluid or Abscess		
Pediatric	Yes IQ		Small Bowel Obstruction		
Pediatric	Yes IQ		Meckel's Diverticulum		
Pediatric	Yes IQ		Intussusception		
Pediatric	Yes IQ	Pectus Deformity Repair:			
Pediatric	Yes IQ		Abramson Repair		
Pediatric	Yes IQ		Minimally Invasive Repair of Pectus Carinatum		
Pediatric	Yes IQ		Minimally Invasive Repair of Pectus Excavatum		
Pediatric	Yes IQ		Nuss Procedure		
Pediatric	Yes IQ		Open Repair of Pectus Carinatum		
Pediatric	Yes IQ		Open Repair of Pectus Excavatum		
Pediatric	Yes IQ		Ravitch Procedure		
Pediatric	Yes IQ	Pyloromyotomy*:			
Pediatric	Yes IQ		Fredet-Ramstedt Procedure*		
Pediatric	Yes IQ		Hypertrophic Pyloric Stenosis (HPS) Pyloromyotomy*		
Pediatric	Yes IQ		Ramstedt Procedure*		
Pediatric	Yes IQ	Scoliosis or Kyphosis Surgery:			
Pediatric	Yes IQ		Fusion +/- Bone Graft		
Pediatric	Yes IQ		Fusion +/- Spinal Instrumentation		
Pediatric	Yes IQ		Reinsertion of Spinal Instrumentation		
Pediatric	Yes IQ		Removal of Spinal Instrumentation		
Pediatric	Yes IQ		Spinal Instrumentation Surgery +/- Fusion		

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA
Pediatric	Yes IQ			Spinal Instrumentation Surgery +/- Bone Graft
Pediatric	Yes IQ			Spinal Osteotomy +/- Fusion
Pediatric	Yes IQ			Spinal Osteotomy +/- Spinal Instrumentation
Pediatric	Yes IQ			Spinal Osteotomy +/- Bone Graft
Pediatric	Yes IQ	Thyroidectomy, Partial or Total		
Pediatric	Yes IQ		Radical neck dissection	
Pediatric	Yes IQ		Sternal split	
Pediatric	Yes IQ		Transthoracic	
Pediatric	Yes IQ	Tonsillectomy*:		
Pediatric	Yes IQ		< 3 years of age*	
Pediatric	Yes IQ		Obstructive sleep apnea (OSA) or Obstructive Sleep-Disordered Breathing*	
Pediatric	Yes IQ		Peritonsillar abscess*	
Pediatric	Yes IQ		Tonsillar malignancy*	
Pediatric	Yes IQ	Transplantation, Allogeneic Stem Cell		
Pediatric	Yes IQ	Transplantation, Autologous Stem Cell*		
Pediatric	Yes IQ	Ureter Reimplantation:		
Pediatric	Yes IQ			Boari Flap
Pediatric	Yes IQ			Laparoscopic Cystonecystostomy
Pediatric	Yes IQ			Open Cystosnecocystostomy
Pediatric	Yes IQ			Psoas Hitch
Pediatric	Yes IQ	Vaginal Delivery, Early Elective		
Pediatric	Yes IQ	Video Electroencephalographic (EEG) Monitoring*		
Pediatric	No IQ	Aortopexy		
Pediatric	No IQ	Atrial Septostomy / Septectomy		
Pediatric	No IQ	Bladder Augmentation		
Pediatric	No IQ	Blalock-Hanlon Procedure		
Pediatric	No IQ	Blalock Shunt / Blalock-Taussig, Modified		
Pediatric	No IQ	Coarctation of the Aorta, Repair (Anastomosis / Waldhausen Procedure)		
Pediatric	No IQ	Epiphysiodesis*		
Pediatric	No IQ	Exstrophy of Bladder, Reconstruction		
Pediatric	No IQ	Fontan Procedure		
Pediatric	No IQ	Gastroschisis Repair		
Pediatric	No IQ	Gastrostomy (G-tube Insertion)*		
Pediatric	No IQ	Jejunostomy (J-tube Insertion)		

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA
Pediatric	No IQ	Myelomeningocele Repair		
Pediatric	No IQ	Omphalocele Repair		
Pediatric	No IQ	Pulmonary Veins, Anomalous Drainage Repair		
Pediatric	No IQ	Patent Ductus Arteriosus:		
Pediatric	No IQ		Division	
Pediatric	No IQ		Ligation	
Pediatric	No IQ	Repair Atrial-Ventricular (AV) Septal Defect (Complete)		
Pediatric	No IQ	Repair Endocardial Cushion Defect +/- Prosthesis / Tissue Graft: Open		
Pediatric	No IQ	Repair Malunion / Non-Union: Epiphyseal Separation*		
Pediatric	No IQ	Repair Pulmonary Atresia		
Pediatric	No IQ	Repair Pulmonic Stenosis		
Pediatric	No IQ	Repair Tetralogy of Fallot		
Pediatric	No IQ	Repair Truncus Arteriosus		
Pediatric	No IQ	Repair Transposition of the Great Vessels		
Pediatric	No IQ	Sphincteroplasty		
Pediatric	No IQ	Urethroplasty*		
Pediatric	No IQ		Epispadias*	
Pediatric	No IQ		Hypospadias*	
Pediatric	No IQ	Ventriculomyotomy		
Specialized Proc.	Yes IQ	Ablative Therapy, Liver: Open:		
Specialized Proc.	Yes IQ			Cryoablation, Liver, Open
Specialized Proc.	Yes IQ			Microwave Ablation, Liver, Open
Specialized Proc.	Yes IQ			Radiofrequency Ablation (RFA), Liver, Open
Specialized Proc.	Yes IQ	Gastric Stimulation*:		
Specialized Proc.	Yes IQ			Enterra Therapy System*
Specialized Proc.	Yes IQ			Gastric Pacemaker Insertion*
Specialized Proc.	Yes IQ	Gender Affirmation Surgery:*		
Specialized Proc.	Yes IQ		Bilateral Mastectomy*	
Specialized Proc.	Yes IQ		Clitoroplasty*	
Specialized Proc.	Yes IQ		Hysterectomy*	
Specialized Proc.	Yes IQ		Intersex Surgery*	
Specialized Proc.	Yes IQ		Metoidioplasty*	
Specialized Proc.	Yes IQ		Ovariectomy/Salpingo-Oophorectomy*	
Specialized Proc.	Yes IQ		Phalloplasty*	
Specialized Proc.	Yes IQ		Scrotoplasty*	

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA
Specialized Proc.	Yes IQ		Urethroplasty*	
Specialized Proc.	Yes IQ		Vaginoplasty*	
Specialized Proc.	Yes IQ	Hyperbaric Oxygen Therapy*		
Specialized Proc.	Yes IQ	Transplantation, Allogeneic Stem Cell:		
Specialized Proc.	Yes IQ		Myeloablative Allogeneic Stem Cell Transplant	
Specialized Proc.	Yes IQ		Nonmyeloablative Allogeneic Stem Cell Transplant*	
Specialized Proc.	Yes IQ	Transplantation, Autologous Stem Cell*		
Specialized Proc.	Yes IQ	Transplantation, Cardiac:		
Specialized Proc.	Yes IQ			Heart Transplant
Specialized Proc.	Yes IQ	Transplantation, Liver		
Specialized Proc.	Yes IQ	Transplantation, Renal		
Specialized Proc.	Yes IQ			Kidney Transplant
Specialized Proc.	Yes IQ	Video Electroencephalographic (EEG) Monitoring*		
Specialized Proc.	No IQ	Transplantation, Heart-Lung		
Specialized Proc.	No IQ	Transplantation, Lung		
Specialized Proc.	No IQ	Transplantation, Pancreas		
Specialized Proc.	No IQ	Transplantation, Small Bowel		
Urology	Yes IQ	Bladder Neck Suspension/Sling, Female:		
Urology	Yes IQ		Open Burch Colpsuspension Procedure	
Urology	Yes IQ	Nephrectomy, Partial		
Urology	Yes IQ	Nephrectomy, Radical		
Urology	Yes IQ		Laparoscopic	
Urology	Yes IQ		Open	
Urology	Yes IQ	Nephrectomy, Simple		
Urology	Yes IQ		Laparoscopic	
Urology	Yes IQ		Open	
Urology	Yes IQ	Nephrolithotomy, Percutaneous*:		
Urology	Yes IQ			Nephrolithotripsy: Percutaneous*
Urology	Yes IQ	Prostatectomy: Open		
Urology	Yes IQ	Prostatectomy: Radical*:		
Urology	Yes IQ		Laparoscopic*	
Urology	Yes IQ		Laparoscopically-Assisted*	
Urology	Yes IQ		Open*	
Urology	Yes IQ		Robotic-Assisted*	
Urology	Yes IQ	Radiofrequency Ablation (RFA) or Cryoablation, Renal: Laparoscopic*		

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA
Urology	No IQ	Cystectomy:		
Urology	No IQ		Partial	
Urology	No IQ		Radical	
Urology	No IQ		Simple	
Urology	No IQ	Cystorrhaphy*		
Urology	No IQ	Cystoplasty*		
Urology	No IQ	Cystourethroplasty		
Urology	No IQ	Drainage, Renal Abscess*		
Urology	No IQ	Enterocystoplasty		
Urology	No IQ	Fistula Repair:		
Urology	No IQ		Nephrocutaneous	
Urology	No IQ		Nephrovisceral	
Urology	No IQ		Pyelocutaneous	
Urology	No IQ		Ureterocutaneous	
Urology	No IQ		Ureterovisceral	
Urology	No IQ	Neobladder Creation:		
Urology	No IQ			<i>Orthotopic Continent Urinary Diversion</i>
Urology	No IQ			<i>Orthotopic Urinary Reconstruction</i>
Urology	No IQ	Nephrorrhaphy		
Urology	No IQ	Nephrotomy*		
Urology	No IQ	Penectomy (excludes gender confirmation surgery)*		
Urology	No IQ	Penoplasty*		
Urology	No IQ	Pyelolithotomy*		
Urology	No IQ	Pyeloplasty: Open		
Urology	No IQ	Pyelostomy*		
Urology	No IQ	Pyelotomy*		
Urology	No IQ	Renal Exploration		
Urology	No IQ	Transureteroenterostomy		
Urology	No IQ	Ureter Reimplantation		
Urology	No IQ	Ureterectomy		
Urology	No IQ	Ureterocalicostomy		
Urology	No IQ	Ureteroenterostomy		
Urology	No IQ	Ureterolithotomy		
Urology	No IQ	Ureterolysis		

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA
Urology	No IQ	Ureteroneocystostomy		
Urology	No IQ	Ureteroplasty		
Urology	No IQ	Ureteropyelostomy		
Urology	No IQ	Ureterorrhaphy		
Urology	No IQ	Ureterosigmoidostomy		
Urology	No IQ	Ureterostomy*		
Urology	No IQ	Ureterotomy*		
Urology	No IQ	Urethral Repair*		
Urology	No IQ	Urinary Diversion, Intestinal Conduit		
Urology	No IQ	Urinary Reservoir, Continent Catheterizable		
Urology	No IQ	Vesiculectomy		
Urology	No IQ	Vesiculotomy, Complicated		
Vascular	Yes IQ	Angioplasty and Stent, Carotid or Vertebral:		
Vascular	Yes IQ		Symptomatic vertebral stenosis	
Vascular	Yes IQ	Bypass, Distal, Peripheral Artery:		
Vascular	Yes IQ			<i>Femoro-Pedal</i>
Vascular	Yes IQ			<i>Femoro-Popliteal</i>
Vascular	Yes IQ			<i>Femoro-Tibial</i>
Vascular	Yes IQ			<i>Popliteal-Pedal</i>
Vascular	Yes IQ			<i>Popliteal-Tibial</i>
Vascular	Yes IQ			
Vascular	Yes IQ	Bypass, Proximal, Peripheral Artery:		
Vascular	Yes IQ			<i>Aorto-Femoral</i>
Vascular	Yes IQ			<i>Aorto-Iliac</i>
Vascular	Yes IQ			<i>Axillo-Bifemoral</i>
Vascular	Yes IQ			<i>Axillo-Femoral</i>
Vascular	Yes IQ			<i>Femoral-Femoral</i>
Vascular	Yes IQ			<i>Ilio-Femoral</i>
Vascular	Yes IQ			
Vascular	Yes IQ	Endarterectomy, Carotid or Vertebral		
Vascular	Yes IQ	Endovascular Intervention, Peripheral Artery:		
Vascular	Yes IQ			<i>Angioplasty, Peripheral Artery</i>
Vascular	Yes IQ			<i>Atherectomy, Peripheral Artery</i>
Vascular	Yes IQ			<i>Embolectomy, Peripheral Artery</i>
Vascular	Yes IQ			<i>Stent, Peripheral Artery</i>
Vascular	Yes IQ			<i>Thrombectomy, Peripheral Artery</i>
Vascular	Yes IQ			

An asterisk "***" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.

Category	IQ Procedures Content Available	Procedure	Approach/Condition	AKA
Vascular	Yes IQ			<i>Thrombolysis, Peripheral Artery</i>
Vascular	Yes IQ		Acute limb ischemia	
Vascular	Yes IQ		Planned anticoagulation*	
Vascular	Yes IQ		Renal failure*	
Vascular	Yes IQ	Endovascular Repair, Abdominal Aortic Aneurysm (AAA)		
Vascular	Yes IQ			<i>Aorto-Aortic Endograft</i>
Vascular	Yes IQ			<i>Aorto-Biiliac Endograft</i>
Vascular	Yes IQ			<i>Aorto-Uniiliac Endograft</i>
Vascular	Yes IQ			<i>Endovascular Aneurysm Repair (EVAR)</i>
Vascular	Yes IQ	Endovascular Repair, Thoracic Aortic Aneurysm:		
Vascular	Yes IQ			<i>Thoracic Aortic Aneurysm Endovascular Repair + Stenting</i>
Vascular	Yes IQ			<i>Thoracic Endovascular Aneurysm Repair (TEVAR)</i>
Vascular	Yes IQ	Resection and Graft, Abdominal Aortic Aneurysm (AAA):		
Vascular	Yes IQ			<i>Aorto-Aortic Bypass Graft</i>
Vascular	Yes IQ			<i>Aorto-Bifemoral Bypass Graft</i>
Vascular	Yes IQ			<i>Aorto-Biiliac Bypass Graft</i>
Vascular	Yes IQ			<i>Axillo-Bifemoral Bypass Graft</i>
Vascular	Yes IQ	Resection and Graft, Thoracic or Thoracoabdominal Aortic Aneurysm		
Vascular	Yes IQ	Thrombolysis, Deep Vein Thrombosis (DVT):		
Vascular	Yes IQ			<i>Catheter-Directed Thrombolysis (CDT)</i>
Vascular	Yes IQ			<i>Pharmacomechanical Catheter-Directed Thrombolysis (PCDT)</i>
Vascular	No IQ	Aorto-Celiac / Aorto-Mesenteric Repair, +/- Graft:		
Vascular	No IQ			<i>Aorto-Celiac / Aorto-Mesenteric Endarterectomy</i>
Vascular	No IQ	Atherectomy: Open		
Vascular	No IQ	Arterial Graft with Re-exploration / Revision / Re-operation		
Vascular	No IQ	Arterial Ligation*		
Vascular	No IQ	Arterial Transposition		
Vascular	No IQ	Cavernous Hemangioma Revision		
Vascular	No IQ	Embolectomy:		
Vascular	No IQ		Celiac Artery	
Vascular	No IQ		Mesenteric Artery	
Vascular	No IQ	Embolectomy / Thrombectomy: Pulmonary Artery		
Vascular	No IQ	Endarterectomy / Bypass, Renovascular:		

An asterisk "*" next to a Procedure, Approach/Condition or AKA means it can be inpatient or outpatient, while no asterisk means considered inpatient only.
