Assessment

Q1. Caregiver: Growth[A]:

- Head circumference (birth to 3 years): _____
- Head circumference-for-age percentile (birth to 3 years): _____
- Length/height: _____
- Length/height percentile: _____
- Weight: _____
- Weight percentile: _____
- Weight-for-length percentile (birth to 3 years): _____
- Weight-for-stature percentile (2 to 5 years): _____
- BMI (2 to 20 years)  BMI Calculator: _____
- Unknown

Q2. Caregiver: By 1 month of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Recognizes parent/caregiver's voice [P1]
- Turns head toward breast or bottle [P1]
- Uses body language, fusses, or cries to communicate [P1]
- Starts smiling [P1]
- Raises head up when lying on tummy [P1]
- Calmed or soothed by rocking, cradling, or being sung to [P1]
- Unknown [P1]
- All milestones reached

Q3. Caregiver: By 2 months of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Smiles at people [P1]
- Coos and gurgles [P1]
- Starts to follow objects with eyes [P1]
- Holds head up [P1]
- Unknown [P1]
- All milestones reached

Q4. Caregiver: By 4 months of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Babbles and makes facial expressions [P1]
- Plays with people [P1]
- Reaches for objects with one hand [P1]
- Brings own hands to mouth [P1]
- Unknown [P1]
- All milestones reached

Q5. Caregiver: By 6 months of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Reacts with recognition to familiar faces [P1]
- Responds to hearing name [P1]
- Brings objects to mouth [P1]
- Rolls over in both directions [P1]
- Unknown [P1]
- All milestones reached

Q6. Caregiver: By 1 year of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Cries when parent/caregiver leaves [P1]
- Says "mama" and "dada" [P1]
- Copies gestures (eg, waving "bye") [P1]
- Stands alone [P1]
- Unknown [P1]
- All milestones reached

Q7. Caregiver: By 15 months of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Imitates parent/caregiver [P1]
- Drinks from cup [P1]
- Scribbles without help [P1]
- Walks well [P1]
- Unknown [P1]
- All milestones reached

Q8. Caregiver: By 18 months of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Points to show others something [P1]
- Says many single words [P1]
- Points to one body part [P1]
- Unknown [P1]
- All milestones reached

Q9. Caregiver: By 2 years of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Plays beside (parallel) other children [P1]
- Follows 2-step commands [P1]
- Plays simple make-believe games [P1]
- Throws ball overhand [P1]
- Unknown [P1]
- All milestones reached

Q10. Caregiver: By 3 years of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Names most familiar objects [P1]
- Shows affection for friends without prompts [P1]
- Turns book pages one by one [P1]
- Kicks a ball [P1]
- Unknown [P1]
- All milestones reached

Q11. Caregiver: By 6 years of age, which of the following milestones did your child **NOT** reach? (Check all that apply.)

- Speaks clearly [P1]
- Tells stories [P1]
- Prints some letters or numbers [P1]
- Hops [P1]
- Unknown [P1]
- All milestones reached

Plan of Care

Problems

P1. Developmental milestone delays in child may be present.

- **Goal:** Developmental status milestones evaluated and plan established to address any identified delays(1)
 - **Interventions:**
 - **ASSIST:** Identifying caregiver's goal priorities, willingness/ability to achieve goals, and preferences for communication and follow-up
 - **ASSIST:** Goal setting that is specific, measurable, achievable, relevant, and with target completion time (eg, short/long-term, prioritized)
 - **ASSIST:** Creation of education plan (eg, Individualized Education Program (IEP), 504 plan) appropriate for child's status, age, and available services(2)
 - **EDUCATE:** Purpose of developmental status assessment and general process for child's care if delays identified
 - **EDUCATE:** Developmental milestones anticipated

- **EDUCATE:** Impact chronic illness may have on growth and development (eg, malabsorption, inflammation, or immobility caused by disease)(3)
- **COORDINATE:** Developmental status assessment with appropriate government organizations (eg, county school system)(4)
- **COORDINATE:** Community services referral, as needed(4)(5)
- **COORDINATE:** Dietitian referral, if indicated(4)(6)
- **COORDINATE:** Protective services or legal authorities, as needed(7)
- **COORDINATE:** Follow-up to evaluate developmental status understanding, referral status, and need for further assistance(8)(9)

Footnotes

[A] Percentiles may be obtained by using clinical growth charts, such as those available through the Centers for Disease Control and Prevention at www.cdc.gov/growthcharts. Percentiles rank the status of a child by showing what percentage of the reference group of the same age and sex the child would equal or exceed. They do not measure how well a child is growing because growth rate is measured over time and has a high level of variation between individuals. To track your child's growth, the Centers for Disease Control and Prevention provides a milestone tracker application at www.cdc.gov/ncbddd/actearly/milestones-app.html. [A in Context Link 1]
