Assessment

Q1. Patient: Are you getting home infusion therapy? (Check all that apply.)

- Blood or blood products that are given through an IV line, specify: _____
- Chemotherapy that is given through an IV line, specify: _____
- Fluid or electrolyte therapy
- Medicine that is given as an injection directly into or around your spinal canal, specify: _____
- Medicine that is given through an IV line, specify: _____
- Nutrition (food) that is given through a feeding tube that goes into your stomach (enteral nutrition)
- Nutrition that is given through an IV line (parenteral nutrition)
- Patient-controlled analgesia (PCA), a computerized pump that you control to give you pain medicine
- Planning to get home infusion therapy in the future [P1]
- Other, specify: _____
- None
- Unknown [P1]

Q2. Patient: What is your infusion treating?

- Specify: _____
- Unknown [P1]

Q3. Patient: Do you get your infusion during the night, while you are sleeping?

- Yes [P1]
- No
- Unknown [P1]

Q4. Patient: Who takes care of your infusion equipment and your infusion therapy? (Check all that apply.)

- I do (self).
- Friend or relative (unpaid caregiver), specify: _____
- Home care nurse, specify: _____
- Durable medical equipment company, specify: _____
- Pharmacy, specify: _____
- I go out to doctor or nurse, specify: _____
- No one [P2]
- Unknown [P1]

Q5. Patient: Are there any problems with the home infusion? (Check all that apply.)

- Care with nutritional infusions (enteral or parenteral) [P1]
- Difficulty adjusting the rate of flow [P2]
- Difficulty caring for the devices [P2]
- Difficulty caring for the IV access site [P2]
- Difficulty with use and changing of dressings [P2]
- Infection or skin irritation at the IV access site [P2]
- Need for help from someone else to administer home infusion [P1] [Caregiver Resources Evaluation](#) CCG
- Transportation to and from doctor or outpatient center [P1] [Transportation](#) CCG
- Trouble getting equipment and supplies for infusion care [P2]
- Trouble with electric power supply [P1]
- Unable to afford medicines or supplies [P1] [Financial Status and Benefits](#) CCG

- Understanding how to do home infusion [P1] Health Literacy  CCG
- Other, specify: _____ [P1]
- None
- Unknown [P1]

Plan of Care

Problems

P1. Home infusion management needed

- **Goal:** Home infusion treatment received safely and efficiently  [P1]
 - **Interventions:**
 - **ASSIST:** Identifying patient's goal priorities, willingness/ability to achieve goals, and preferences for communication and follow-up
 - **ASSIST:** Goal setting that is specific, measurable, achievable, relevant, and with target completion time (eg, short/long-term, prioritized)
 - **ASSIST:** Appointment scheduling
 - **ASSIST:** Self-care plan creation between patient and provider (eg, goals, management, treating symptoms, getting help)
 - **ASSIST:** Identifying community resources for home modifications, such as backup power source for overnight treatment
 - **ASSIST:** Contacting electric company if there is an infusion pump for overnight treatment
 - **EDUCATE:** Purpose and duration of infusion therapy
 - **EDUCATE:** Home infusion care(1)(2):
 - Skin care around access site
 - How to give medication or food (eg, bolus, continuous, flushes)
 - Prevent skin breakdown with good hygiene.
 - When and where to get help for problems
 - Medication side effects to monitor for during infusion
 - What to do if infusion will not go in (change body position, contact provider if blocked)
 - What to do if IV comes out (call home care agency or provider in charge of IV infusion)
 - **EDUCATE: When to get emergency help(3)(4):**
 - Central venous access device complications (eg, line break, unresolved bleeding around insertion site)
 - Hypervolemia (eg, weight gain of more than 2.2 pounds (1 kg) per day and tachycardia)
 - Pulmonary embolism (eg, sudden chest pain that moves to jaw, arms, or between shoulder blades; dyspnea)
 - Gastrointestinal distress, severe or new (eg, nausea, vomiting, diarrhea, cramping)
 - Pain during infusion
 - **EDUCATE: When to call the provider(4)(5):**
 - Infection (eg, low-grade fever, sore throat, nausea, vomiting, or diarrhea)(6)
 - Infusion therapy side effects (eg, blood sugar changes, constipation, diarrhea, vomiting, jaundice)
 - IV problems (eg, bleeding around site, pain, difficulty flushing, occluded, broken)
 - Medical equipment problems or needs
 - Malnutrition (eg, weight loss, dehydration, muscle loss)(7)
 - Medication problems (eg, side effects, access, administration)
 - **COORDINATE:** Pharmacy medication support, if indicated
 - **COORDINATE:** Home care referral, if indicated(2)
 - **COORDINATE:** Medical equipment and supplies, if indicated
 - **COORDINATE:** Electricity backup plan for equipment, as needed
 - **COORDINATE:** Care team meeting, if needed(8)(9)
 - **COORDINATE:** Communication between care team members and care plan reconciliation(8)(10)(11)
 - **COORDINATE:** Follow-up contact to evaluate understanding of home infusion, referral status, and need for further assistance(12)(13)
 - **SEND:** How to wash your hands (Illustrated)  (Spanish)
 - **SEND:** Caring for your PICC line (Illustrated)  (Spanish)
 - **SEND:** Changing the dressing on your PICC line (Illustrated)  (Spanish)
 - **SEND:** Safety in the home - Fire and other risks  (Spanish)

P2. Home infusion problems present

- **Goal:** Home infusion problems evaluated and resolved
 - **Interventions:**
 - **ASSIST:** Identifying patient's goal priorities, willingness/ability to achieve goals, and preferences for communication and follow-up
 - **ASSIST:** Goal setting that is specific, measurable, achievable, relevant, and with target completion time (eg, short/long-term, prioritized)

- **ASSIST:** Appointment scheduling with provider for home infusion problem evaluation and review of self-care plan
- **EDUCATE:** How to decrease risk of complications(4)(14):
 - Use good hygiene when caring for IV.
 - Keep IV from loosening or falling out by securing it.
 - Keep diary of input, output, weight, and medication.
- **COORDINATE:** General surgeon referral, if indicated
- **COORDINATE:** Laboratory testing, if indicated
- **COORDINATE:** Outpatient imaging, tests, or procedures, if indicated
- **COORDINATE:** Home care referral, if indicated(2)
- **COORDINATE:** Dietitian referral, if indicated
- **COORDINATE:** Social worker referral, as needed(15)
- **COORDINATE:** Medical equipment and supplies, if indicated
- **COORDINATE:** Care team meeting, if needed(8)(9)
- **COORDINATE:** Communication between care team members and care plan reconciliation(8)(10)(11)
- **COORDINATE:** Follow-up contact to evaluate understanding of home infusion, referral status, and need for further assistance(12)(13)
- **SEND:** How to measure your heart rate (Illustrated)  (Spanish)
- **SEND:** Intake and output diary (Illustrated)  (Spanish)
- **SEND:** Weight diary (Illustrated)  (Spanish)

Evidence Summary

Specialty society: The Infusion Nurses Society guidelines note that many parenteral therapies, including antimicrobials, blood and blood products, inotropic agents, chemotherapy, biologic agents, patient-controlled analgesia, and parenteral nutrition, can be administered in the home setting. Skilled monitoring during IV therapy may be indicated if the infusion site requires specialized training for access or the therapy requires special training or technique for preparation or has the potential for an adverse event that would require clinical intervention.(16)
