Evidence Summary

Quality standards: The American Case Management Association's Transitions of Care Standards indicate that patients' health risks should be assessed at each care episode or transition, a care management plan should be established and communicated across the care settings, and an evaluation should be done of the patient/family/caregiver's understanding of health status and self-care.(9)

Quality standards: The American Case Management Association's Transitions of Care Standards indicate that processes should be in place to identify patients at risk for care transition problems, patients' health risks should be assessed at each care episode or transition, and a care management plan should be established and communicated across care settings.(9)
