Assessment

Q1. Patient: Are there any new or worsening respiratory problems? (Check all that apply.) **QM**

- Activity intolerance [P1]
- Chest tightness or pressure [P1]
- Coughing [P1]
- Exercise intolerance [P1]
- Phlegm volume increase or color change [P1]
- Positioning increases symptoms (eg, lying flat). [P1]
- Sleep problems [P1]
- Wheezing that you can hear [P1]
- Other, specify: _____ [P1]
- None
- Unknown [P1] [P2]

Q2. Patient: Is there any shortness of breath with the following activities? (Check all that apply.)

- Bathing or grooming [P1]
- Dressing [P1]
- Eating [P1]
- Lying down [P1]
- Sitting [P1]
- Walking across the room [P1]
- Walking around the home [P1]
- Walking up 5 or fewer steps [P1]
- Not short of breath
- Unknown [P1] [P2]

Q3. Patient: When would you get emergency help for breathing problems? (Check items understood.) **QM**

- Breathing heavily and fast
- Breathing medicine (eg, rescue medicine) does not work.
- Cannot say a sentence in one breath
- Chest pain or tightness
- Lips, nose, or nails turn blue or gray.
- Not able to breathe
- Pain when breathing
- Wheezing that quickly gets worse
- Other, specify: _____
- Not all appropriate information known [P2]
- None [P2]
- Unknown [P2]

Q4. Patient: When would you call the doctor for breathing problems? (Check items understood.) **QM**

- Breathing medicine does not work as well as it used to.
- Do not take or cannot take breathing medicine
- Fever over 100.4 degrees F (38 degrees C)
- Have to use breathing medicine more than usual
- Problem with respiratory equipment or medicine

- Start having signs that breathing problems are coming on (eg, short of breath when doing usual activities, or talking causes coughing)
- Went to emergency room because of breathing problems
- Other, specify: _____
- Not all appropriate information known [P2]
- None [P2]
- Unknown [P2]

Q5. Patient: Do you need any help with your respiratory care? (Check all that apply.) **QM**

- Affording medicine or equipment [P2] Financial Status and Benefits [CCG](#)
- Following pulmonary care program [P2] Pulmonary Treatments [CCG](#)
- Following schedule or knowing when to take medicine or use equipment [P1] [P2] Cognitive Impairment [CCG](#) Medication Adherence [CCG](#)
- Knowing how to use equipment or take medicine [P2] Nebulizer Management [CCG](#) Oxygen Management [CCG](#) Tracheostomy Management [CCG](#) Ventilator Management [CCG](#)
- Managing problems of trying to swallow [P1] [P2] Aspiration Risk Management [CCG](#)
- Medicine or equipment does not work well. [P1] [P2]
- Not enough caregiver help [P2] Caregiver Resources Evaluation [CCG](#)
- Other, specify: _____ [P2]
- No
- Unknown [P2]
- Not applicable

Quality Measures

- Disease Management Quality Measures:
 - Information provided from this question may be requested by various accrediting organizations.

Plan of Care

Problems

P1. Respiratory problem evaluation needed

- **Goal:** Respiratory problems evaluated and managed
 - **Interventions:**
 - **ASSIST:** Identifying patient's goal priorities, willingness/ability to achieve goals, and preferences for communication and follow-up
 - **ASSIST:** Goal setting that is specific, measurable, achievable, relevant, and with target completion time (eg, short/long-term, prioritized)
 - **ASSIST:** Appointment scheduling with provider for respiratory problem evaluation and creation of self-care plan
 - **EDUCATE:** How to monitor for problems and when and how to get help
 - **COORDINATE:** Follow-up to evaluate respiratory status, referral status, and need for further assistance(1)(2)

P2. Respiratory complications information needed

- **Goal:** Respiratory complications better understood
 - **Interventions:**
 - **ASSIST:** Identifying patient's goal priorities, willingness/ability to achieve goals, and preferences for communication and follow-up
 - **ASSIST:** Goal setting that is specific, measurable, achievable, relevant, and with target completion time (eg, short/long-term, prioritized)
 - **ASSIST:** Appointment scheduling with provider for respiratory problem evaluation and creation of self-care plan
 - **ASSIST:** Self-care plan creation between patient and provider (eg, goals, management, treating symptoms, getting help)
 - **ASSIST:** Communication between multiple providers(3)
 - **EDUCATE:** Respiratory self-care program(4):
 - Importance of treatments
 - Medication role
 - Complication prevention (stay inside on "code red" days, avoid triggers)(5)
 - Equipment use and care
 - **EDUCATE:** Airway discomfort care and oxygenation promotion(6):
 - Sit with elbows resting on knees.
 - Lean forward over back of chair or against wall.

- Elevate head of bed 30 degrees (or support head with 2 pillows when in bed).
- When in bed, turn at least every 2 hours to promote drainage of secretions.
- Breathing exercises (eg, controlled cough, pursed-lip breathing)
- **EDUCATE:** Factors associated with increased risk of respiratory problems (eg, smoking, chemotherapy)
- **EDUCATE: When to get emergency help(7)(8):**
 - Respiratory impairment (eg, gasping for air, choking, cyanosis, chest pain, severe dyspnea)(7)
 - Heartbeat irregular, new
- **EDUCATE: When to call the provider(9):**
 - Cold or flu symptoms that do not go away
 - Cough that does not stop
 - Change in color of phlegm (mucus)
 - Dyspnea makes it harder to say a sentence, or cannot walk across the room.
 - Breathing medication problems (eg, increased use, decreased effectiveness)
 - Pain when breathing
 - Trouble eating or sleeping because short of breath
 - Medication problems (eg, side effects, access, administration)
 - Medical equipment problems or needs
- **COORDINATE:** Pulmonologist referral, if indicated
- **COORDINATE:** Medical equipment and supplies, if indicated
- **COORDINATE:** Home care referral, if indicated(6)
- **COORDINATE:** Communication between care team members and care plan reconciliation(10)(11)(12)
- **COORDINATE:** Follow-up to evaluate respiratory status, referral status, and need for further assistance(1)(2)
